EXPERIENCE

Project Manager Team Lead

Crestdigico Limited / From 2022 - Present

- Front-End Development: Develop and maintain user interfaces for web applications using HTML, CSS, and JavaScript, ensuring responsive and intuitive designs.
- Back-End Development: Build server-side logic and databases for applications, focusing on performance, security, and scalability.
- Database Management: Design, optimize, and maintain databases, ensuring efficient data storage and retrieval.
- Server Management: Configure, manage, and deploy web servers and application servers to ensure the availability and performance of web applications.
- API Integration: Integrate third-party APIs and services to enhance the functionality and features of web applications.
- Code Testing: Write unit tests and conduct thorough testing to identify and fix bugs and issues in the application.
- Version Control: Use version control systems (e.g., Git) to track changes, collaborate with team members, and manage codebase efficiently.
- Performance Optimization: Optimize the performance of web applications, including page load times and server response times.
- Security: Implement security best practices to protect applications from vulnerabilities, threats, and data encryption.
- Documentation: Create technical documentation, including code comments and system documentation, for future reference and collaboration.
- Collaboration: Collaborate with cross-functional teams, including designers and product managers, to understand project requirements and user needs.
